

F500 Digital Forensics Specialist (Essentials)

Duration 3 days Beginner and Intermediate

With the developed and intensive version of the "F300 Fundamentals of Forensic Informatics" training program, this training is positioned at the beginner-intermediate level in the fields of digital forensics and data analysis. Participants who want to improve themselves in this field will seek answers to the questions of what, why, how, where, when and who on the sample data examined. Although this training is defined as beginner-intermediate level, it will be useful for advanced level examiners to refresh their current knowledge, learn new and current concepts.

MODULE 1 Methodology of Digital Forensics Digital Evidence Concept	MODULE 8 Acquisition of Volatile Data and RAM	MODULE 15 Working on Virtual Machines
MODULE 2 Code Of Criminal Procedure Penal Code	MODULE 9 Hash Concept and Usage	MODULE 16 Checking Disk Encryptions
MODULE 3 Evaluation of Data as Digital Evidence	MODULE 10 Processing of Acquired Image File	MODULE 17 Image Mount
MODULE 4 Incident Response	MODULE 11 Data Analysis	MODULE 18 Artifacts examination
MODULE 5 Digital Evidence Collection	MODULE 12 Mobile Devices	MODULE 19 Fast Triage Image Acquisition and Review
MODULE 6 Image Acquisition	MODULE 13 Mobile Device Acquisition and Data Analytics	MODULE 20 Windows File Systems
MODULE 7 Live Forensics Concept and Applications	MODULE 14 Reporting	MODULE 21 Meta Data Data Carving
